NE-1878 All-Metal-Door Inverter Microwave

The NE-1878 is equipped with Panasonic's unique Inverter technology, which enables faster, more even, gentler cooking. It also uses less energy and the all-metal door design ensures easy cleaning, extending the lifespan of the microwave

Even Heating

Inverter technology allows you to cook, reheat or defrost your food without creating cold spots or overcooking edges. This Inverter microwave delivers an accurate power level; when you ask for 60% power, the oven time chosen. This applies no matter what power level is delivers 60% power for the entire duration of the cooking selected giving you better, more even cooking results.

Energy Saving

With Inverter microwaves, you can save up to 6.3% on energy consumption*, which is good for the environment, and your wallet. *compared to NE-1853

Splatter Shield Detection

The NE-1878 has been programmed to cease operations when the ceiling plate is not in place, preventing damage to the cavity and expensive repairs. To allow continuous use, the NE-1878 comes with a spare ceiling plate.

Metal Door

The world's first all-metal door professional microwave with Inverter technology. An innovative design, specifically intended for the UK market. A full-metal door microwave that looks like a conventional oven. It adapts to every environment and you can even install it in your open kitchen. Most importantly the inside of the metal door has no ridges, seals or film to clean around, leaving it totally smooth. This makes the inside of the unit very easy to clean and can increase the lifespan of the oven.

Panasonic's unique Inverter Technology was invented in 1988

Precision cooking, for optimal results! Thanks to the precise power control dishes are evenly cooked in no time.
